

AbaBuild●

The software for the
construction industry

AbaBuild offers you a comprehensive functionality tailored to the needs of construction companies.

AbaBuild for the Construction Industry is based on the current tariff and calculation data of the Swiss Association of Master Builders and supports the business processes of construction and civil engineering throughout the offer, order, and invoicing processes.

Proven comprehensive solution

The software fits seamlessly into the Abacus range of programs and uses the synergies of the various applications. This includes the modules Project Management, Financial Accounting, Cost Accounting, HR/Payroll with Time Recording, Assets Ledger, Materials Management, Operation Centre, ARGE Accounting and Real Estate Management, which you can use as required. The iPad app AbaSmart with its daily report enables mobile data collection directly from the construction site.

Licence costs by company size

The licence costs for AbaBuild are based on the size of the company. AbaBuild is also available in a web version as a subscription model. Pre-configured industry clients save lots of time and money during implementation. The solution is continuously being further developed and adapted to the lat-est industry conditions.

Certified industry solution

Traditional Swiss companies in the construction industry have been relying on AbaBuild for years. The solution for the construction industry from Abacus is certified by SBV and CRB.
