

# AbaBuild●

The software for Electricians

---

AbaBuild is an industry solution optimised for electricians. From preliminary estimates to reporting and invoicing; all work is carried out seamlessly through the use of wizards that guide you through the programme.

Efficiently process planned maintenance and malfunction orders with the Service Management module. The dispatch of service personnel, including scheduling, allocation of materials, monitoring execution and feedback of completed work and used materials is displayed in graphical or tabular form. Service dispatch and mobile processing of service orders on the tablet enable you to fulfil orders easily.

Manage, process and invoice maintenance contracts efficiently and with the integrated Service Management. Object data management

guarantees an even better overview of your customers and seamlessly documents your work and service assignments so that they can be retrieved quickly at any time. Structured processes save you time and money and will impress your customers with a professional appearance. Digitise your daily processes - innovative, flexible and practice-oriented. AbaBuild is constantly being further developed and adapted to the latest industry conditions or legal requirements.

# AbaBuild for Electricians at a glance
