

AbaBuild●

Software for the Timber
Construction industry

AbaBuild is an industry solution optimised for timber construction companies. From the preliminary calculation using the current rates and calculation data from Holzbau Schweiz to the design and detailed invoicing, AbaBuild guides you through order processing.

The software provides you with the foundation for optimised costing and makes managing your customer addresses very simple. Pre-defined template clients and optimised processes save you time and money. Benefit from mobile and digital processes, even on the construction site.

The uniform interface and the clear navigation make the AbaBuild application easy to understand right from the start. Digitise your daily processes - innovative, flexible and practice-oriented. Your

employees also expect a modern administration software and will value AbaBuild in their daily work.

The software was developed in collaboration with industry specialists and is based on the current rates and calculation data from Holzbau Schweiz. It is also CRB certified. AbaBuild is constantly being further developed and adapted to the latest industry conditions or legal requirements.
