

AbaGovernment

The software for public administrations

Progressive administrations require modern and functionally comprehensive solutions to be able to meet ever increasing demands.

Expanding on the established software modules for finance, payroll accounting and human resources, Abacus has developed AbaGovernment, an industry solution for public administrations.

Proven solution

Six cantons and 700 cities and municipalities in German-speaking and French-speaking Switzerland with a combined population of over 2.8 million rely on Abacus Business Software.

Market leader

In terms of market share, Abacus now covers around 33 percent of the Swiss market.

The approximately 500 Abacus employees and experienced Abacus partners, together with public sector users, ensure that the software is continuously adapted to changing needs and legal requirements with the help of new technologies. Abacus offers you maximum security and long-term protection of your investments in the software.

Since 1996, together with the St. Gallen partner company innosolv, Abacus has been continually developing the leading integrated solution innosolvency for cities and municipalities.
