DMS-Connector
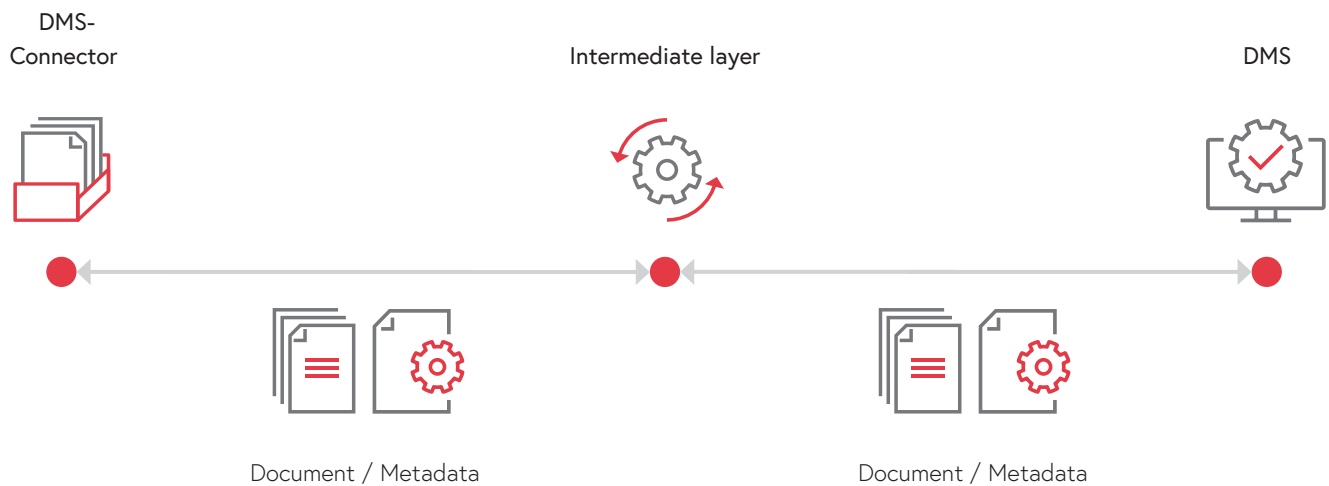

Abacus Archiving & Scanning additional function

Process overview: Filing documents external DMS

DMS-Connector	Intermediate layer	DMS

Document / Metadata   Document / Metadata

The Abacus DMS Connector connects your existing document storage system (DMS) seamlessly and easily with Abacus Business Software and puts an end to redundant company documents.

Archiving is already integrated into Abacus Business Software as a document storage option. This is an increasingly central function in the ERP environment. Documents are information carriers in company processes and in the exchange with customers. Almost all important processes in a company are supported by documents. Today, these are mainly in electronic form.

In many cases, in addition to Abacus ERP, one of the many available DMS systems is already being operated, which specialises entirely in the management and storage of documents.

TThe Abacus DMS Connector enables you to use the power of both systems at the same time without having to forego familiar work routines. Your DMS system can be seamlessly integrated into Abacus Business Software via an interface which synchronises documents bi-directionally between the two systems.

The DMS connection is completely transparent for the Abacus user. The documents are physically stored exclusively in the DMS, but can still be viewed, edited and opened from Abacus dossiers.

ABACUS

Your benefits

- Legally compliant filing ensures GebüV/GDPR
- Automated, bi-directional comparison of documents and metadata retrieval
- Complete, seamless integration into existing Abacus programmes (dossiers, evaluations with documents attached, reports, search)
- Saves storage space - no redundant data storage in Abacus and DMS, separate storage for documents and ERP system
- Extends possibilities for mapping company processes
- Generalized DMS interface*

*The interfaces to the respective DMS are developed and provided by Abacus solution partners or official partners of the respective DMS manufacturer.

The following interfaces are currently available:
- M-Files
  Solution partner: One Solutions SA
- ELO
  Solution partner: ECM Solutions GmbH
- Kendox
  Solution partner: FIVE Informatik AG
- Canon Therefore
  Solution partner: Canon AG
- S3 systems can also be connected
