

AbaBuild●

The software for building services engineering

The complete solution for building services engineering and building envelopes from one source.

AbaBuild for Building Services and Building Envelopes with heating, ventilation, air conditioning, refrigeration, sanitation, plumbing, roof and facade accompanies your business processes from offer to final invoice.

AbaBuild was developed in cooperation with industry specialists and is based on the calculation and tariff data of the Swiss Building Envelope Association and suissetec and is CRB certified.

Service disposition and employee planning

Efficiently process planned maintenance and malfunction orders with the Service Order Management module. Dispatch your service personnel, including scheduling, allocation of materials, monitoring of execution and feedback of completed work and used materials in graphical or tabular form.

Process and pay for service orders on location

Service disposition and mobile processing of service orders on the tablet enable simple and efficient order processing and payment via SumUp directly at the customer's location.

Affordable and customised software for trade industries

The licence costs for AbaBuild are based on the size of the company. The software is also available in a web version as a subscription model. Pre-configured industry clients save lots of time and money during implementation. The solution is continuously being further developed and adapted to the latest industry conditions.
