

Document exchange in the healthcare sector ●

Electronic transmission of documents

How the document exchange works

01

Data preparation

Entering the relevant patient data and services in the Abacus software.

02

Conversion

Conversion of the documents into the required electronic format.

03

Electronic dispatch

Sending documents to the recipient via a secure, encrypted connection via network partners.

Optimise your processes with the Abacus E-Business solution for the healthcare sector. The platform enables efficient and secure electronic data exchange between service providers, payers and patients.

Abacus E-Business offers a comprehensive platform for the electronic exchange of documents in the healthcare sector, featuring high security standards and data protection-compliant invoicing of services. With functions such as the generation of patient copies and recovery documents and secure data transmission via the network partners MediData and Swisscom Health, Abacus covers all essential requirements.

The automated generation and dispatch of invoices in a standardised format guarantees fast and error-free communication with

cost units, trust centres and insurers. The encryption of sensitive health data and strict compliance with data protection guidelines ensure maximum security. Thanks to seamless integration into the ERP system and encryption of the communication channels, secure transmission of sensitive patient data is guaranteed.

From data preparation and conversion into the required transmission format to the electronic sending and receiving of documents - Abacus optimises the entire process of electronic document exchange in the healthcare sector.
